

ConFoBi Symposium

24.10.23-25.10.23

[Liefmann Haus, Goethestrasse 33, Freiburg](#)

Day 1, Tuesday 24 October 2023

		Speaker
9:00	Plenary	
	Welcome Session and ConFoBi Updates since last Symposium	Ilse Storch, Michael Wohlwend
	MobiTools: Monitoring Biodiversity with Remote Sensing Tools	Selina Ganz (FVA)
	Growing out of ConFoBi - new perspectives on ConFoBi's research	Julian Frey
10:30	Coffee & Tea break	
11:00	Research Presentation ConFoBi Graduate students	
	Effects of habitat tree retention on the development and production in continuous cover forests in Central Europe	Rose Marie Oksanen
	The reforestation of damaged spruce stands in a changing climate under the influence of different clearing intensities	Mareike Mohr
	Disentangling direct and indirect effects of forest structure on biodiversity: Bat responses to forest structure, management and insect prey	Anna-Lena Hendel
	Impact of different forest biodiversity conservation strategies on bats	Melina Dietzer
	Effects of forest management intensity on bird functional diversity in European Forests	Mariela Yapu Alcazar
12:15	Lunch + interactive history and retention session	Louise Keppler, Yarmiah Bukhari, Christoph Jochem, Simone Roverelli (MSc Students) Catalina Munteanu
13:30	Round table discussion	
	Lets understand the foundations of eachothers' science better	Moritz Lauser
15:00	Coffee & Tea break	
15:30	Round table discussion	
	What do I do with my question, and how do I choose the tools to answer it	Elizabeth Baach, Jakob Albrecht

ConFoBi Symposium

24.10.23-25.10.23

[Liefmann Haus, Goethestrasse 33, Freiburg](#)

Day 2, Wednesday, 25 October 2023

9:00	Round table discussion Making research relevant to practice	Theresa K. Loch Philipp Mack
10:30	Coffee & Tea break	
11:00	Poster session Unraveling Social Networks within the Implementation of Forest Biodiversity Conservation Impacts of structural complexity on the below ground compartment of understory vegetation in temperate forests In The Spotlight: Speckled Wood Butterflies' Use of Light Patches in Managed Forests What can spy satellites reveal about the forestry history of the Black Forest? Uncovering the hidden world of deadwood arthropods: A comparative eDNA metabarcoding study identifies tree surfaces as prime sampling sites From energy to diversity: A mechanistic investigation into the energy availability-species diversity relationship LiDAR forest structure: Theory and Praxis	Theresa K. Loch Barbara Meyers Simon Heitzler Xiang Liu Christoph Jochem Mohammad Shuvo Elizabeth Baach Jan Feigl
12:15	Lunch + interactive science communication session	Jacob Shea (Science Journalist)
13:30	Research Presentations Epiphytic lichen and bryophyte diversity in forests stands – Proximity effects and their main drivers Intraspecific body size dynamics in parasitoid wasps: Unveiling the complex interplay habitat structure and resource availability. Response of carabid beetle assemblages to forest management and roe deer in SW Germany	Theresa Möller Riko Fardiansah Joao Pereira
14:30	Coffee & Tea break	
14:45	PhD and Postdoc Research presentations (continued) Forest Structure and Biodiversity: Lessons from the Far North and an Extensive Literature Overview How accurately do we perceive environmental change, and what drives shifts in personal baselines?	Carlos Landivar Catalina Munteanu
15:15	Coffee & Tea break	
15:30	Round table discussion Successful cooperation in ConFoBi and academia	Catalina Munteanu
18:00	Dinner Oma's Küche, Hildastraße 66, 79102 Freiburg im Breisgau	
19:00	Closing discussion ConFoBi plan next year
